Clothing for the two-man survey team can be found in the preceding description.

9-110-700	Blankets, large	each	24
	Stop watches	each	4

This compact unit can work in contaminated areas for what ever time the health physicist determines is within the realm of safety. When they reach their daily tolerance level they could be exchanged for two other technicians working back in the collecting point. Each collecting point should be so equipped to handle ambulatory patients.

These collecting points may be set up in tents or available buildings on the periphery of the area of destruction and serve two purposes:

1. The emergency care and treatment of Agency casualties from the area of the atomic blast.
2. Screening of personnel and equipment before it is sent to the Decontamination Center or to the refuge headquarters.

Stock No.	Description	Quantity	Unit
2-000-160	Adherent, 4 oz.	2	bot.
2-003-985	Bandage, gauze roller, 1"x6 yds., 12s	10	pkg.

Sig. CBA	30 Batteries, Flashlight type	1	box
	Goggles M 1944	2	each

~~SECRET~~

Agency personnel casualties may be evacuated to the collecting points either a) by litter or b) by station wagon. However, only the most urgent cases should have priority for transportation by the station wagon.

All equipment thus far discussed with the exception of the communication equipment may be removed from the station wagon, and operated on the ground.

In addition to the radiation equipment carried by each of the two-man survey teams an ordinary physician's bag will be supplied with the following items contained therein.

See attached list of Contents of "Physician's Emergency Medical Bag and Contents."

Approved For Release 2000/08/23 : CIA-RDP79-00434A000200010043-1

It is not anticipated by this department that the health physics aspects of this evacuation will under any circumstances be turned over to Civilian Defense authorities.

The following is a list of the basic medical and surgical equipment necessary for each of the five collecting points. The radiation equipment will be found in the following list.

Approved For Release 2000/08/23 : CIA-RDP79-00434A000200010043-1

~~SECRET~~

BASIC RADIATION EQUIPMENT FOR EACH COLLECTING POINT

2 SU-2A Laboratory Monitor with TCC-2 Geiger Tube and mount at \$ 310.00  
2 SU-5 Beta Gamma Survey Meter at \$235.00  
2 SU-1B Portable Survey Meter at \$275.00  
24 Tracer Lab Film Badges at \$24.00  
2 V.I. Minometers each with one 0.2r Chamber at \$160.00  
8 V. I. 0.2r Chambers at \$12.50  
1 SC-2A "64" Scaler at \$395.00  
1 SM-60A Electric timer at \$55.00  
4 Stop Watches  
24 Lead Bricks at \$9.60  
1 E-14 Rectangular Lead Container at \$60.00  
4 Replaceable Battery Packs for SU-1B at  
4 " " " " SU-5  
4 " " " " SU-10  
4 " " " " V-I Minometer

In addition to the above radiation equipment the collecting points should contain the following basic medical items in the quantities listed.

List 5

Stock No.	Item	Quantity	Unit
1-582-010	Albumin Serum human 25 Gm 100 cc	24	Can
1-598-380	Blood Grouping serum Anti B 25 tests	12	btl.
1-598-410	Blood Grouping Serum Anti A 25 tests	12	btl.
1-605-835	Insulin Injection U-40 10 cc	10	btl.
1-605-845	Insulin Injection U-80 10 cc	10	btl.
1-605-845	Insulin Injection Protamin Zinc U40 10cc	10	btl.
1-607-104	Plasma, normal dried 500 cc	100	pkg.
1-607-400	Procaine Penicillin G for aqueous Injection 300,000 units	200	btl.
1-607-422	Procaine Penicillin G crystallin in oil 300,000 units per 10 cc	200	btl.
1-596-575	Aureomycin Hydrochloride Capsules 0.25 Gm 100's	4	btl.
4-277-000	Hemacytometer Set complete	4	each
4-276-875	Hemacytometer Cover glass	36	each
4-276-925	Hemacytometer Pipette, Red Corpuscle	36	each
4-276-935	Hemacytometer Pipette, White Corpuscle	36	each
4-283-200	Hemometer Sahli Type	4	each
4-287-040	Illuminator, Microscope, Junior 110 volt	2	each
4-315-000	Microscope Monocular	1	each
4-322-375	Microscope Stage, Mechanical	1	each
4-434-350	Test tube, 15 x 125 mm 12's	4	pkg.
4-426-465	Support, Test tube, wire 40 tube	2	each
4-395-060	Slide, Glass, mirror, plain 25x75 mm, 72's	2	box
4-401-200	Stand apparatus support base 6 1/2 x 9"	1	each
4-451-060	Tripod, Iron	2	each
4-456-100	Tube Hematocrit, Wintrobe	8	each
4-460-450	Tubing Rubber 1/8" inside diameter 1/32" wall	6	foot
4-107-000	Burner Bunsen, Tirrill Type	2	each
4-460-470	Tubing Rubber 1/4" inside Diameter 1/16" wall	25	foot
4-461-470	Tubing Rubber 1/2" inside Diameter 3/32" wall	16	foot
4-463-100	Tubing Rubber Latex 1/8" inside diameter 1/32" wall	30	foot
4-112-250	Burner, Gasoline Blast	2	each
4-102-820	Burner, Alcohol, Barthel type	2	each
4-129-450	Centrifuge, Small, 110 volt AC-DC	1	each
4-133-160	Tube, Centrifuge, glass, conical bottom ungraduated 10 cc	24	each
4-142-000	Tube, centrifuge, glass, conical bottom graduated 15 cc, 12's	2	pkg.
1-098-300	Benedict's Reagent Powder q.s. 120 cc	2	can
1-061-005	Ammonia solution, strong reagent 1 lb.	1	btl.
1-179-000	Ether, anesthesia 1/2 lb	10	can
4-030-360	Bath, water, pharmaceutical 5 inch	2	each
1-002-470	Acetic Acid, glacial, 1 lb. U.S.P.	1	btl.
1-003-000	Acetone 1 lb. ACS	1	btl.
	Sodium Nitroprussid 1 lb.	1	btl.

B. Decontamination Center

The individual design and calibration of instruments designed to monitor waste water, smoke from the incinerator, valuable equipment, vital records, and specific requirements for monitoring of the decontamination shower room should be under the direct supervision of the health physicist. Many problems will arise because of the unique nature of this work, and because this department lacks the advise of a health physicist, it is anticipated that many points will be overlooked with respect to this unusual radiation monitoring problem. However, the basic radiation equipment is contained herein and can be redesigned and further instruments added when and if a health physicist is added to this Staff.
